

# Dolovent™

Contains a specific combination of key ingredients

Without Dolovent™

With Dolovent™

Contributes to the normal functioning of the nervous system and to normal psychological function

## What does Dolovent™ do?

**Dolovent™** capsules contain a specific combination of the key ingredients magnesium (600mg) and riboflavin (400mg) which have been clinically proven and shown to contribute to the normal functioning of the nervous system, a reduction of tiredness and fatigue and further contributes to normal psychological function. **Dolovent™** also contains co-enzyme Q10 (150mg) as well as further vitamins and minerals.

**Dolovent™** should be taken regularly over a long period of time according to clinical research done by: **Gaul et al.**

## Key Information about Dolovent™

- Delivers key ingredients
- 600mg of magnesium
- 400mg of vitamin B2 (riboflavin)
- 150mg of coenzyme Q10

High-dose riboflavin, magnesium and coenzyme Q10 compensates for a deficiency in these three key micronutrients.

## Recommendation for use:

- Take 1-2 capsules twice daily. Once in the morning and once in the evening with or after a meal or as directed by your health care practitioner. Use this product daily for several months.

## Important Note:

- Food supplements should not be used as a substitute for a varied diet. Do not exceed the stated recommended daily dose.
- Use this product daily for several months according to the recommendation for use. If you take **Dolovent™** do not use other magnesium or riboflavin containing products. Pregnant women and children should use the product under medical supervision. Riboflavin may cause a harmless yellow discolouration of the urine. Bloating feeling and mushy stools are possible.
- As for all magnesium-containing products, **Dolovent™** should not be used in cases of renal dysfunction. Because of a possible disturbance of absorption, **Dolovent™** should be used with a distance of 1-2 hours if you take drugs with the following active ingredients: Tetracyclines, ferrous-containing substances, Sodium Fluoride, Isoniazid, Chlorpromazine and Digoxin.

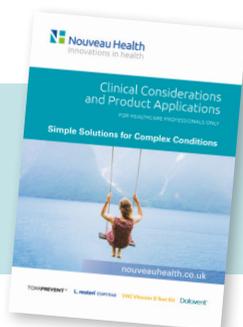

Keep out of reach of children
